CARALL303

Flatbed with wire mesh panels and TWO side sliding doors installed on trailer carryall CARST-14

Standard trailer comes complete with wire mesh panels and TWO side sliding doors. Mainly used in railcar maintenance and cleaning. Widely applied for refuse and linens removal from sleeper cars. This arrangement, with sliding doors on each side, allows easier loading and unloading from either side. Side sliding doors also allow longer 'trains' of trailers, often 4 or 5 to a tractor. Max carrying capacity 1.400 Kg.
